

Duration	30 min
Guided	Yes
Prior booking required	No

Hook a bait to catch the game in our pond which could turn out to be a whole new experience especially for amateurs. The pond within the plantation is home to a variety of water life where the common species found are- Red snapper and Indian carp varieties like Katla, and Rohu.

The pond is what we believe the heart of the plantation where it takes a descend of a series of 200 steps to reach. Traditional methods of fishing are used and for beginners your guide will assist you in your first catch. Responsible fishing can be practised once you choose to leave your catch into the pond or you could savour it where our chefs will be happy to make it the way you want.

Popular with children, fishing is a soft experience well enjoyed by guests at After the Rains.
