

PLANTATION WALK

Duration	90 minutes
Guided	Yes
Prior booking required	No

Take a walk in our 16 acre plantation, only to discover the life, aura and nature around the place. Being one of the most popular activities in the resort, what makes it different from other experiences is its comparatively short trail, changes in terrain, unique spots you encounter and the overall adventure it offers.

The activity starts by a brief on the demography, plant and animal life of the area. After which, you are guided to an offbeat trail, where you discover different dimensions, crops and demography of the land. The route takes you to the forest boundaries, a beautiful stream which flows within, through fruit trees and to an interesting discovery of plant and animal life. Local stories of the land, its culture and history are narrated to make the trek more interesting.

By the end of the activity, one would discover a sustainable environment where the wild and man play their roles promptly. The walk in the plantation can be more of fun and is a 'must do' in the After the Rains experience list.
